The Art of the Cap Table

How Do You Know What to Sell a Company for?

- Two main bases for high tech companies
 - market cap plus a premium

TechEx.in

nbm birac

The Art of the Cap Table

How Do You Know What to Sell a Company for?

- Two main bases for high tech companies
 - If public, market cap plus a premium
- If private - **X**
 - i.e. X times its sales
 - Every industry has its "X"
 - Find three or four recent transactions in the same space and calculate
- Pharmaceuticals:
 - X=5
 - E.g. Genzyme's sales were \$4 billion
 - Sanofi paid \$20 billion

A Fundamental Principle of License Valuation

- We probably shouldn't even TRY to get paid upfront in full
- Our job is to EXTRACT the value over time
 - Share in the growth in value

Example: Gebrade

- In 1983, Robert Cade of U. FL. offered Stokely van Camp the rights for \$1 million
- Stokely van Camp declined
 - Said the test market would cost \$1 million, paying Cade to double their financial risk
 - Offered to pay royalties
- To date, Stokely / Quaker / Pepsi have paid 10^8 * Rights consisted of patent only
