Other Projects we were working on

Growth of a recombinant culture of *Pichia pastoris* which produced the S1. spike protein complex of SARS-COVID 19. This was done during peak COVID infection. Our work was on the recovery of the S1 spike protein, which was used in the preparation of detection kits

Isolation and characterization of LAB cultures for use in preparation of fermented foods

Startups are a special category of businesses

Every business has 3 key elements:

- ❖ It tries to solve a problem or meet an unmet need
- ❖ There are customers who desire the solution and are willing to pay for it
- ❖ It has to cover its cost and eventually earn more money that it spends

Startups are high risk – high reward businesses that focus on future opportunities for impact (financial, social, environmental etc) with potential to grow rapidly if successful.
